

Scenario 4: Stress Testing Text Extraction and Tokenizer Boundaries

Dr. Hasson visited the U.S.A. at 5 A.M. to meet senior AI research scientists regarding multi-agent vector search logic.

This sentence contains a massive cluster of consecutive spaces that the clean function should resolve.

Does the sentence splitter handle multiple exclamation marks properly??? Yes, it absolutely should!!!

The following chunk is separated by multiple consecutive empty lines to stress test the parser newline handling logic.
